Alex Hsiao (Wei-Chun Hsiao)

FULLSTACK & GENAI ARCHITECT

Currently serving as a **GenAI Engineer** with hands-on expertise spanning full-stack application development, bare-metal GPU virtualization (NVIDIA GPU Operator & HAMi), stateful Multi-Agent LLMs with LangGraph, distributed microservices, and ISO/IEC 27001 security compliance.

Experience

NOV 2025 – PRESENT

Tatung System Technologies Inc. (Tatung World Tech)

GenAI Engineer

Zhongshan Dist., Taipei

- Introduced LLM AI Agents into office automation, building an internal web application that automates form filling and classification.
- Delivered an enterprise asset management system for a client, integrating hybrid AI Agent, Document Search, Tool Call, **RAG**, and BM25 with S3-compatible file management, GIS coordinates, agent-based SQL querying, and automated AI Agent performance evaluation; deployed local models on **RTX PRO 6000** GPUs with Multi-Token Prediction, serving inference via vLLM and llama.cpp on Kubernetes across multiple GPUs.
- Contributed to **WAF (CrowdSec)** and **Vault (OpenBao)** deployments, establishing reliable and secure containerized infrastructure.
- Contributed to an agent-based business card automation system.
- Assisted in rolling out GPU server clusters and establishing standard operating procedures for LLM deployment.
- Spearheaded full-stack development for Generative AI Agent web applications utilizing React.js, FastAPI, and LangGraph multi-agent orchestration.

STACK · React.js, FastAPI, LangGraph, SQL Server, PostgreSQL, RabbitMQ, IIS, HAMi, GPU Operator, Longhorn, Cloudflare Tunnel, llama.cpp

SEP 2025 – JUN 2026

AIGC Research Club, National Chiayi University

Faculty Advisor / Technical Consultant

Chiayi City

- Invited as faculty advisor and guest lecturer during the club's founding period, helping define its AIGC research direction and academic ethics guidelines.
- Taught in person throughout the term, sharing the latest generative AI trends and hands-on practice with members and raising the club's overall technical level.

MAR 2025 – NOV 2025 (9 MOS)

National Institute of Cyber Security (NICS)

Software Engineer

Zhongzheng Dist., Taipei

- Drove cloud security initiatives and contributed directly to the development of the **AWS Government Configuration Baseline** for national infrastructure.
- Researched and implemented cutting-edge AI features and autonomous workflows using LangGraph and Multi-Agent LLMs.
- Constructed secure serverless and containerized APIs with Next.js, FastAPI, and MongoDB backend storage.

STACK · Python, Next.js, LangGraph, FastAPI, CloudFormation, MongoDB, AWS Security Baselines

JUN 2024 – MAR 2025 (10 MOS)

Cloud Service Provider (Agency)

Project Engineer / Software Engineer

Nangang Dist., Taipei

- Architected and implemented enterprise GCP and AWS cloud environments, executed complex cross-cloud migrations, and configured secure site-to-site VPNs.
- Designed centralized monitoring platforms and deployed production Kubernetes clusters with fine-grained RBAC security policies.
- Managed network topology planning and security perimeters: WAF, Firewalls, Load Balancers, and VPC peering.

STACK · Kubernetes, GCP, AWS, Terraform, Ansible, WAF, Cloud Architecture

SEP 2021 – OCT 2023 (2 YRS 2 MOS)

Information Security Lab, NCYU CSIE

Master's Researcher & Project Assistant

Chiayi City, Taiwan

- Conducted advanced research in deep learning and cybersecurity intrusion detection for web application security.
- Designed a novel hybrid architecture combining Multi-Model CNN, Bidirectional GRU, and Multi-Head Self-Attention for SQLi and XSS attack detection.

STACK · Python, PyTorch, TensorFlow, Django, Flask, Deep Learning, IEEE Publication

DEC 2019 – MAR 2020 (4 MOS)

Ticrown Asset Management Ltd.

PHP Assistant Engineer / Web Designer

Daliao Dist., Kaohsiung City

- Collaborated on the development and UI implementation of a PHP Laravel-based logistics management system for a shipping container enterprise.

STACK · PHP, Laravel, MySQL, JavaScript, CSS

Technical Skills

GenAI & Machine Learning	vLLM Inference Engine · LangGraph Multi-Agents · HAMi vGPU Slicing · NVIDIA GPU Operator · PyTorch & TensorFlow
FullStack & Distributed Systems	FastAPI / Python · Node.js (Async Runtimes) · RabbitMQ (AMQP Broker) · Django / Flask · PHP / Laravel
Cloud Fabric & Orchestration	Kubernetes (CKA Certified) · AWS Cloud (SAP Certified) · Google Cloud (PCA Certified) · Terraform (IaC Automation) · Docker & Podman
Databases & Resilient Storage	PostgreSQL · Microsoft SQL Server · MongoDB & MySQL · Longhorn HA Block Storage · MinIO / S3 Parquet

Certifications & Publications

NVIDIA Certified Professional: Generative AI LLMs

NVIDIA // CREDLY VERIFIED · verify

Certified Kubernetes Administrator (CKA)

LINUX FOUNDATION / CNCF · verify

AWS Certified Solutions Architect – Professional (SAP)

AMAZON WEB SERVICES · verify

Google Cloud Professional Cloud Architect (PCA)

GOOGLE CLOUD · verify

ISO/IEC 27001 Lead Auditor (Information Security)

TKSG // ISMS GOVERNANCE · verify

PCPP1™ – Certified Professional Python Programmer Level 1

OPENEDG PYTHON INSTITUTE // CREDLY VERIFIED · verify

IEEE Xplore: Deep Learning SQLi & XSS Detection

IEEE XPLORE // PEER REVIEWED · verify

Education

M.S. in Computer Science & Information Engineering — National Chiayi University

Master's thesis published in IEEE Xplore (Doc. 10210155): a hybrid CNN / BiGRU / multi-head attention architecture for SQLi and XSS detection.
